Gojko Adzic

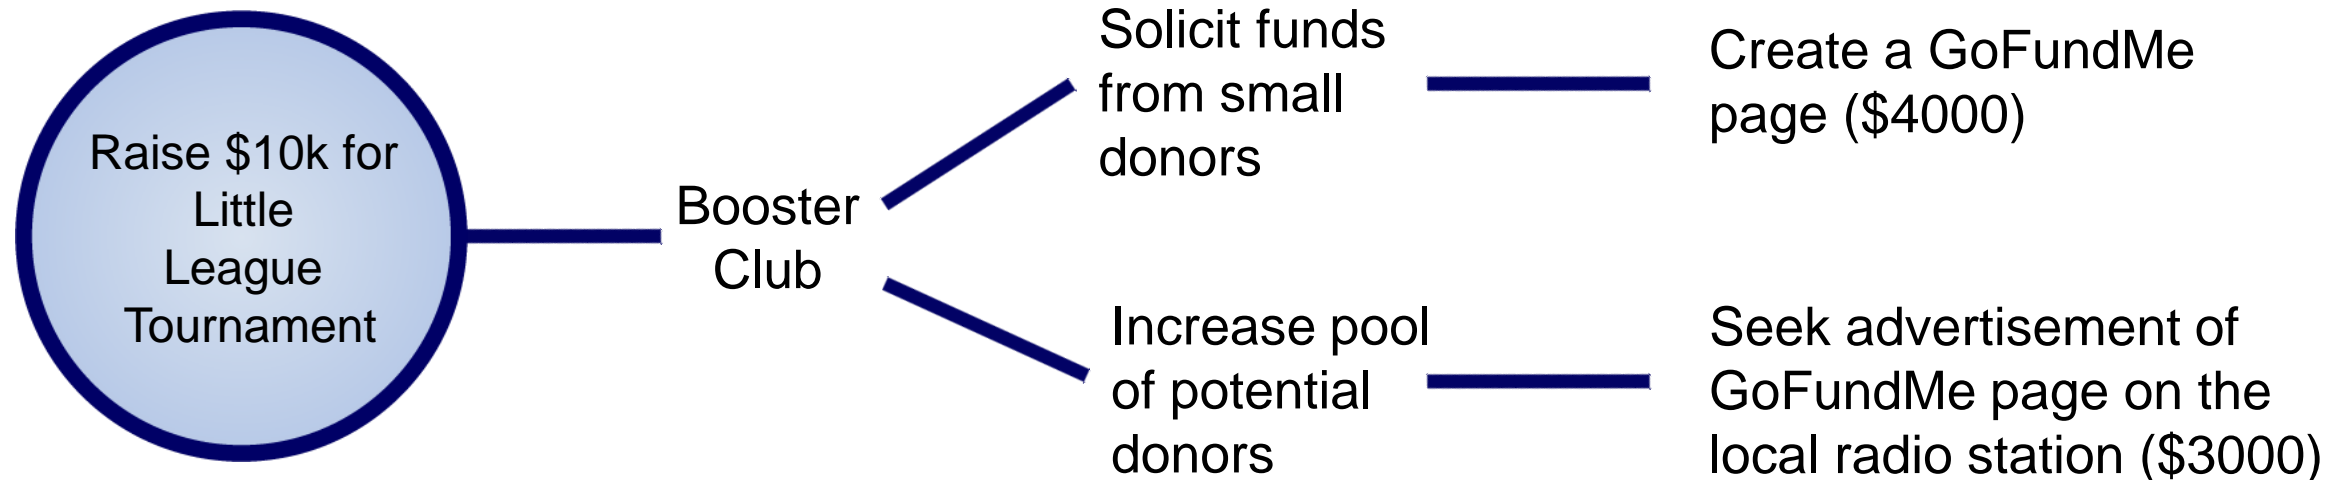

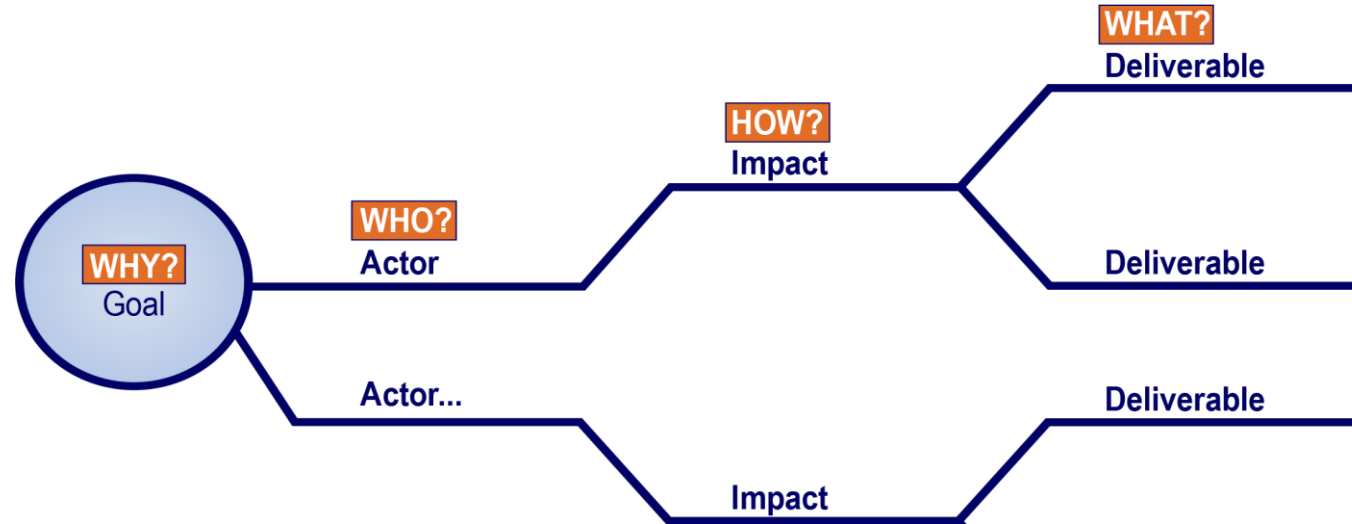

Impact mapping is a facilitated planning activity which helps key decision-makers determine what is most valuable and how to take action

Elements of an Impact Map

- Goal
 - Why are we doing this
 - Measurement – What amount of change do we desire to achieve
- Actors
 - Who will be impacted by this?
 - Who can help to achieve the goal?
 - Who can obstruct?
 - Who is a part of *building, consuming, or influencing* the solution
- Impacts
 - How will this impact the actor(s)?
 - How should their behaviour change?
 - How can they help?
 - How can they obstruct?
- Deliverables
 - What can we do/deliver to cause an impact
 - Measurement – What amount of change will this deliverable make towards our goal
 - We call this the *Projected Net Impact*

Example of an Impact Map

Create a User Story

User Story:

As a Booster Club member

I will create a GoFundMe page

So that I can solicit from small donors ...*in order to* raise \$10k for the Little League Tournament

Goal Creation and Projected Net Impact

Goal – Raise \$10k for your kid's little league tournament

Raise funds for little league tournament

Scale (what we measure)

Net gain in

Benchmark (what we have now)

\$1,000.00

Constraint (minimum acceptable value)

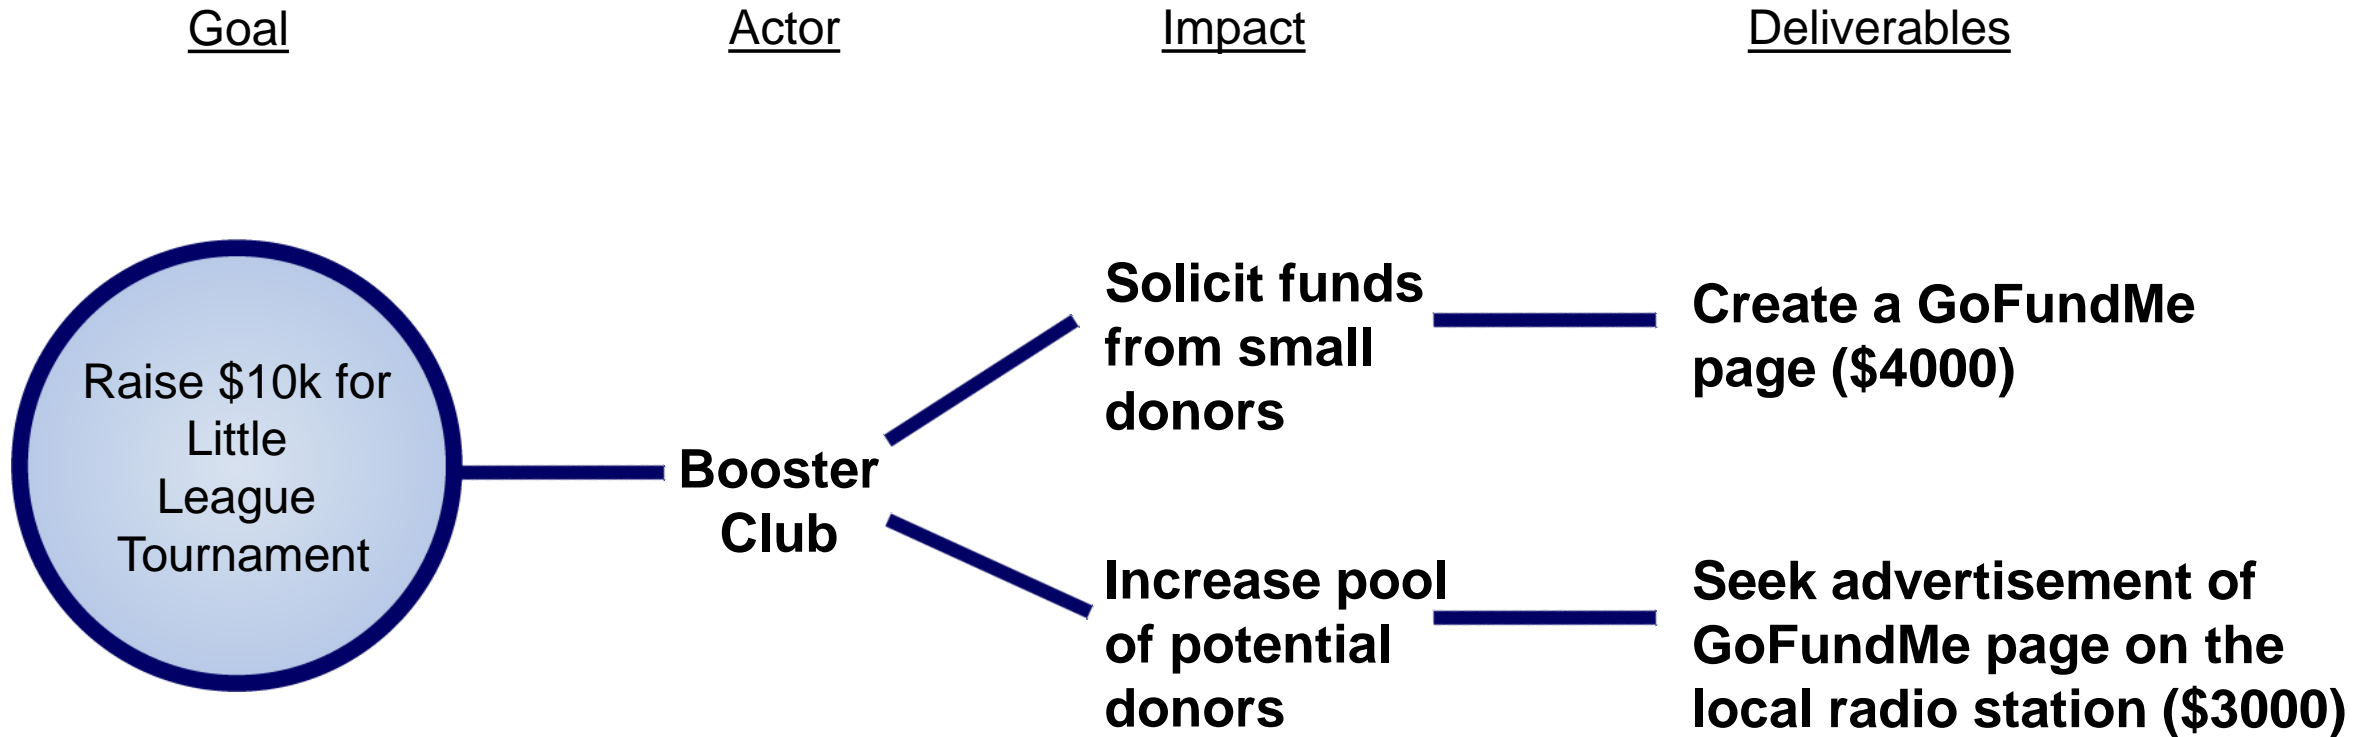

\$8,000.00

Target (desired amount)

\$10,000.00

Create a User Story

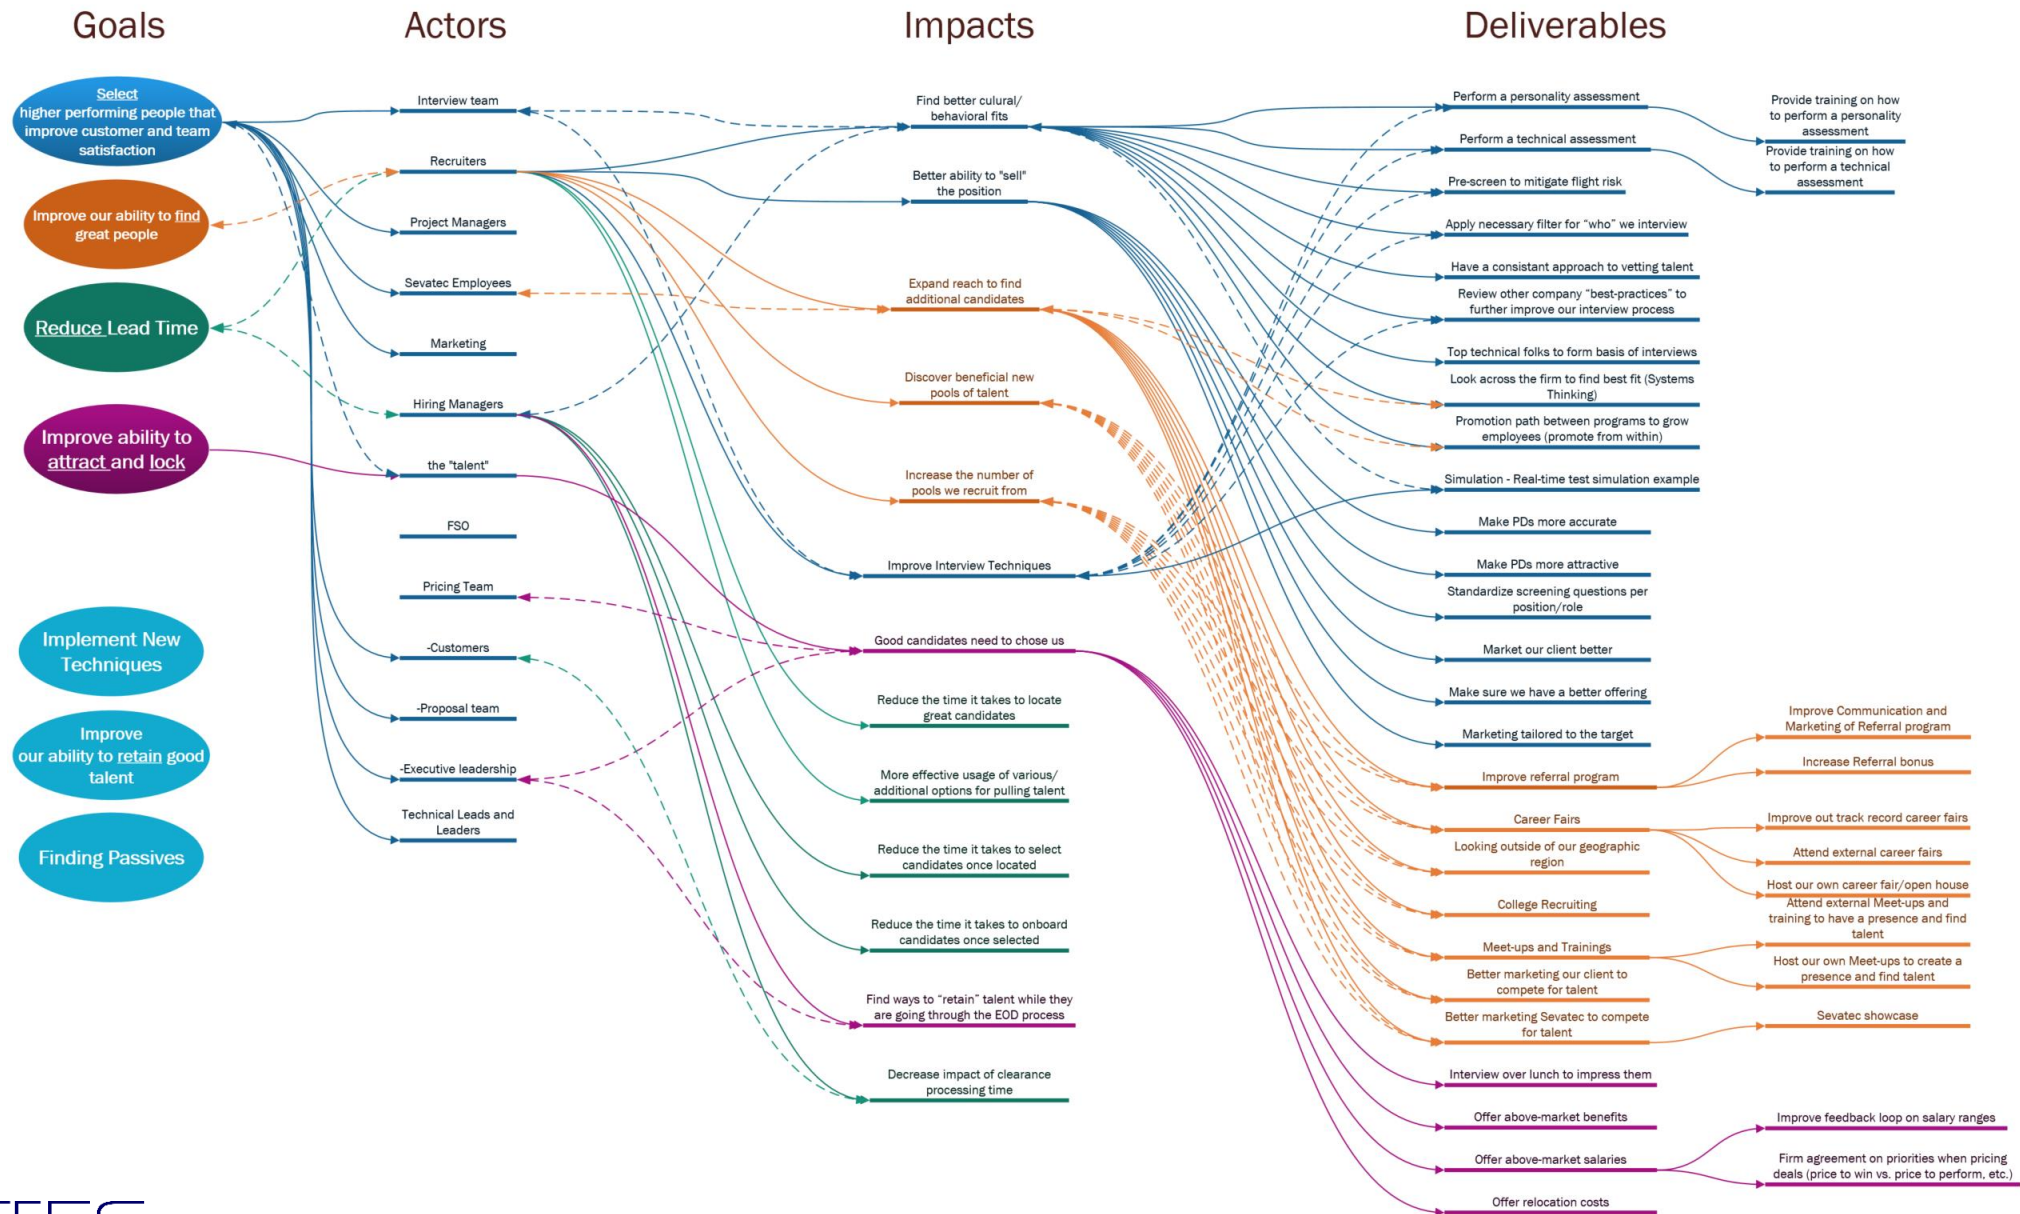

Create a User Story

As an <actor>

I will <deliverable>

So that <impact>...*in order to* <goal>

Example Impact Map

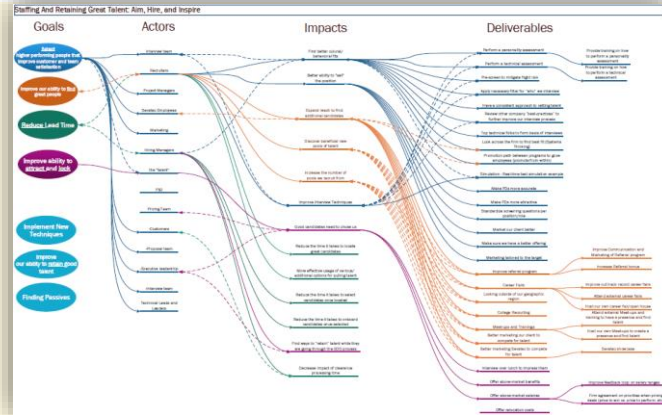

The Big Picture of How the Process and Tools Can Fit Together

Goals and Objectives

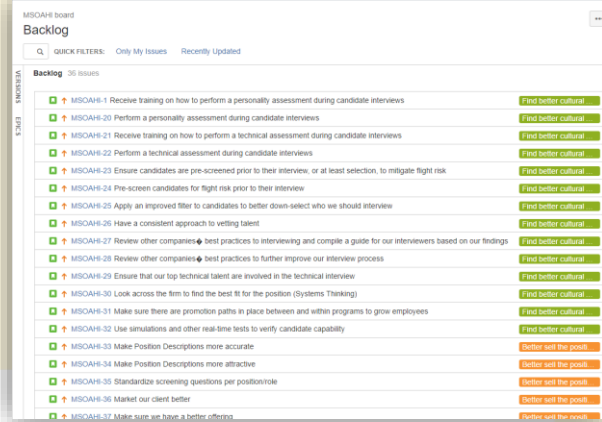

Impact map to align actions to goals

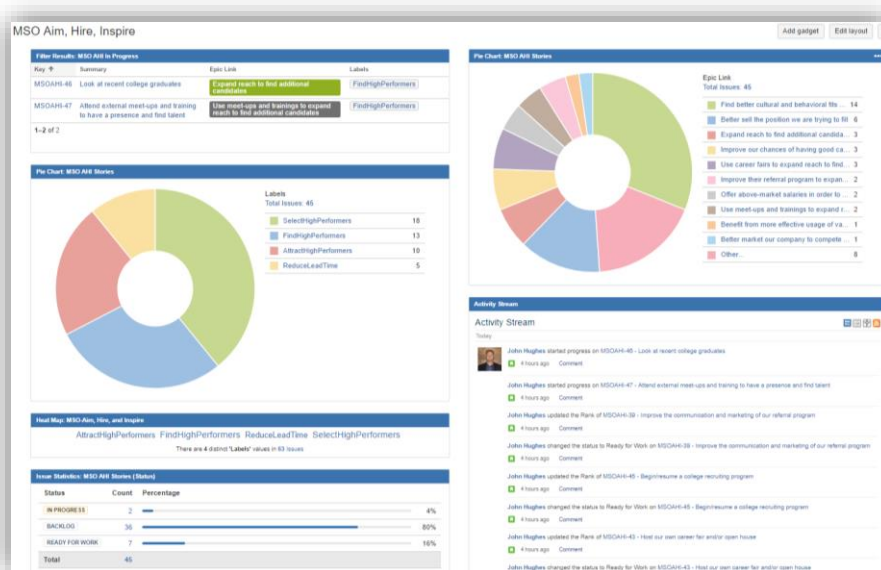

Backlog of user stories to persist
and provide order

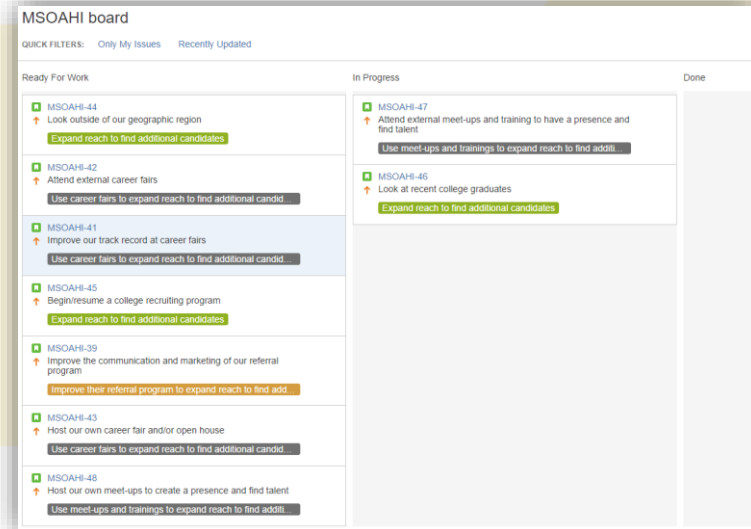

As a/an Recruiter and/or Hiring Manager
I want to attend external meet-ups and training to have a presence and find talent
So that Sevatec may use meet-ups and trainings to expand reach to find additional candidates
In order to improve our ability to find great people

Dashboard to keep big picture goals and progress in sight

Kanban Board to manage near term effort

Impact Mapping Workshop

Raise funds for little league tournament

Scale (what we measure)	Net gain in
Benchmark (what we have now)	\$1,000.00
Constraint (minimum acceptable value)	\$8,000.00
Target (desired amount)	\$10,000.00

Using Your Map

- Rank order your deliverables/stories
 - Typically best done by holding a discussion on those with the highest projected net impacts
- Create user stories for your threads
- Build a backlog of your user stories

USER STORY FORMAT

As a(n) **<Actor>**
I will **<Deliverable>**
So that I **<Impact>**
In order to **<Goal>**

Let's Hear What You Created

- Share a user story or two from your top threads
- Discuss opportunities to experiment with this practice in your organization
